

USER GUIDE

1. We need to use an iPhone with a camera to run this app.

Category:

[Upload Image](#)

2. The above screenshot is the main screen of the app. We need to click the Upload Image button to get the prediction.
3. Then we need to click the camera icon to open the camera to click the picture to be predicted. After clicking on the camera, we need to accept the permissions and click a picture to get the prediction.
4. The results looks like below after uploading a picture.

11:45

SOS  

Category: Level 4 - Poor
